“ France is getting it”

France has gone under attack by the Animalzanian Government. They are attacking them very hard. This is the French Bombardment War. The Animalzanians are going to start up Red Crosses and Help the Army, Woman's Help for the Army, Men's Army Club, and Children's Army Fund Program. “We will not give up. The French are Communists. “ Weather in Farjay”

It is going to be a little rainy during the beginning of the month. Few sunny days on the first week. Very bad weather for moving things out. On the second week we will have light winds and a sunny week. A few snow falls and one rainy day. Excellent time for barbecues and other outdoor things. Especially when the army needs help in their bandages, shirts, guns etc. The next week will be a bit chilly and will have a good deal of rain, snow, and sunlight. We expect a tornado to pass very close to Farjay. It will hopefully head north on its own. The weather is going to help the plants the farmers are growing turn out nicely. We hope to see a bountiful crop this year. Remember that next year we will not plant seeds. So leave a bit of

the grain available for the crop to grow next year. Remember that the ground should have a rest each seven years. We need to stand firm on the Bible. Thank you!

The heavens declare the glory of God and the firmament showth His handiwork. - Psalm 19:1

“A New Solar System”

On June 10th we sighted a planet filled solar system. There are nine planets circling in elliptical orbits around the sun of that system. We have called this system, the Orion XIII Solar System.

We will further classify these planets. The one closest to the sun we call Marory VI. The second is Vorneus II and both are uninhabitable. The third is very interesting because it has water and land AND a habitable atmosphere like Animal. We call it Earth XIII. {meaning habitable}. The next is a little red planet which we call Marths. It is uninhabitable. The next four are all gaseous planets { meaning made with gas }. They are uninhabitable also. The last one, the ninth, is Puto. It's temperatures are very low. It is might be habitable. These planets are going to be investigated after the Discovery XVI returns to

*Animal. We will send the Voyager VII out into
space to investigate Puto and Earth XIII.- ~*

An Example

Moral: Persevere

There once was a little, low wooded building with a brick fire place out of which smoke seemed to pour out of day and night. This was the blacksmith's shop. One day he got an order for a hundred nails and 14 horses which needed shoes. He began to heat up the iron till it was red hot. He then pinched it with his iron pincers and formed it by hitting it with his anvil. He stood there and formed every one of with especial care. The town boys said jeeringly, "Do come out and play with us. Stop your work. Do! Do!" but he shook his head and replied, "I have work to do. I must shape this or else I won't be doing my job." The boys would come day after day and tease him to make him come over to them. He only said, "No," and went back to his work. Soon he was done with the nails. Now he must make 54 horse shoes. He again heated the iron and pounded it out with his anvil. The boys still called for him, and he would still say no. Later the gentleman returned and

he shoed the horses and gave him the bag of nails. His work was done. God shapes us into the thing He wants us to be just as the blacksmith shapes out the things he wants to make. We can also learn to persevere.
